Marriage A la Mode Shelley Tobin 2003 This book traces the development of wedding attire from the silver and white brocades of eighteenth-century formal, aristocratic weddings to the elegant crinoline revival of the late 1950s. Whenever possible, Shelley Tobin focuses on gowns and accessories where she can trace the provenance of the wearer, or the maker, to provide a social history of the past 300 years. The accoutrements of the brides reflected the luxury trades of the eighteenth and nineteenth centuries, but it was not until the 1850s that the white wedding became an established tradition. Even then, it was not available to everyone. Although formal, the wedding gown followed fashion and was often recycled as a suitable dress for the first presentation at court as a married woman. Wedding veils, if not passed down through the family, might also be used in another form, particularly as christening robes during the early twentieth century. The trend for producing costume dramas for stage and screen (e.g., Sense and Sensibility directed by Ang Lee, 1995) has seen the recreation of a number of period styles, and these in turn have influenced today's deigners.

Wedding Dress Across Cultures Helen Bradley Foster 2003-09 Although the Victorian white wedding dominates western bridal dress and large portions of former colonial empires, marriage rituals vary significantly throughout the world. The Japanese, for instance, combine both traditional ceremonies with receptions utilizing western approaches to dress. In the Andes the bride will personally create a multi-layered dress to showcase her weaving skills. Berber brides in Morocco wear binding clothing that covers their faces, a notable contrast to Canadian prairie-province brides whose stylized gowns individualize and enhance body shape. This engaging book examines the evolution and ritual functions of wedding attire within the context of particular cultures. It raises questions as to the relationship between contemporary wedding attire and traditional values. It discusses the changes international migrations have had upon the wedding dress of several ethnic groups. It provides insights into numerous societal relationships to weddings, such as the ban on bridal-produced embroidery in dowries in India, the challenges

individual values have to larger societal ones in themed weddings, and the relationship between the return to pre-western attire and identity politics. Exploring these issues, the authors provide unusual insights into the centrality of dress in shaping individual identity as well as its importance in reflecting cultural values and ideals.
